

## Maintain Comfort and Secure Low, Stable Energy Prices

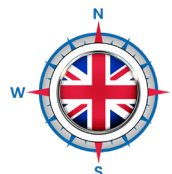

Throughout the United Kingdom, travelers increasingly expect hotels to implement sustainable practices. In fact, 62 percent of travelers consider environmental impact when choosing a hotel. The challenge for U.K. hotels and other hospitality providers is to maintain a high level of service and luxury while contending with sometimes unstable energy prices. For many hospitality properties, energy costs are second only to labor expenditures. By controlling them, hotel managers and property owners can save a significant amount of money each year.

### **Get Affordable, Stable Renewable-Energy Rates**

FBR Energy and its consultants understand the complexities of hospitality-industry energy procurement for boutique hotels and national chains alike. With decades of experience and contacts throughout the U.K. and the world, FBR Energy excels at navigating volatile commodity markets. FBR Energy experts will secure the lowest rates possible with no upfront fees—energy suppliers pay our fee. For more than five years, FBR Energy has helped customers in the U.K. find low rates and go green. FBR Energy can also show hotels how to implement cost-saving changes, such as installing smart monitors, and create sustainable day-to-day practices.

**Reserve your savings with FBR Energy. Get a free estimate and find out how FBR Energy can help U.K. hotels and hospitality providers lower their energy costs and go green by contacting Edward Carey at +1-347-598-4235; [edwardcarey@fbrenergy.com](mailto:edwardcarey@fbrenergy.com).**
